• WORK EXPERIENCE

Pavia (PV) Italia
November 2022 - Present

PhD Student (Full Time)
IUSS Pavia, PhD SDC XXXVIII Sustainable Development and Climate Change

Within the curriculum "Socio-economic risks and impacts" at the Economic Department of the University of Perugia, my PhD research activity focuses on the consumption side of the decentralized energy transition. This includes examining the socio-economic potential of renewables analyzing, evaluating energy policies/governance efficacy, investigating consumer awareness for green electricity, addressing energy poverty, and measuring the environmental effects of low-impact lifestyles and energy saving nudging. Currently, with a regional microeconomic behavioral approach, I'm focusing through the RECs (Renewable Energy Communities) framework on dynamic end-use coordination strategies (demand-side), production optimizations (supply-side) in an attempt to make their potential (high-uncertainty) benefits just and desirable for citizens and on social leverages to promote these tool.
